1. OVERVIEW

1.1. Identifier

CPSC1045-Section004-Team11

1.2. Title

Japanese Characters

1.3. Purpose

This product is a focused educational application designed to simplify the learning of two basic Japanese characters, specifically Hiragana and Katakana letters. Our application offers an intuitive interface where users can effortlessly familiarize themselves with these fundamental elements of the Japanese language.

The primary goal of our application is to provide an engaging and user-friendly app for individuals seeking to learn and practice the most basic and root of にほんご (Japanese language). Every individual has to start from somewhere, and this is the right platform or application to start with. By simply clicking on Romaji (English letters) per character, users can visualize and practice each corresponding Japanese character displayed dynamically on the canvas.

What sets our application apart is its mainly focus on Hiragana and Katakana letters, deliberately excluding the complexity of Kanji characters. We strive to simplify the learning journey by focusing on isolated characters, avoiding the complexities of sentence and word constructions.
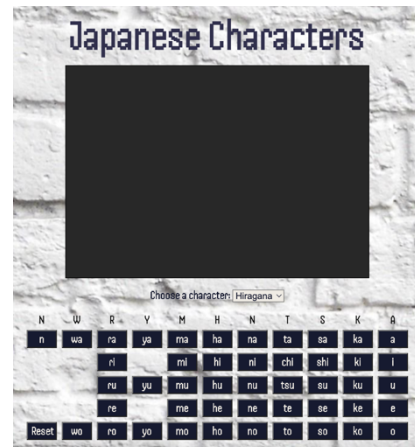

2. USING THE PRODUCT

## 2.1. Special considerations

None.

2.2. Instructions for use

Our product is very simple and straightforward. Follow these steps:

Step 1: Open the file named "japanesecharacters.html".

Step 2: Once the main page loads, select your desired character set – Hiragana or Katakana.

Step 3: Click on the letter button of your choice, ranging from 'a' to 'n'. Watch as the selected letter promptly appears on the canvas.
